

Digital Fiber Sensors

E3X-DA-S

An Extensive of Standard Functions to Support the World's Highest Level of Stable Detection.

- "GIGA RAY" Giga Power Lighting Element to create a wide variety of value.
- Power turning to easily set the optimum light level.
- Active Threshold Control (ATC) reduces incorrect operation due to dust, oil, or other influences.
- Automatic Power Control (APC) is always enabled to stabilize emitter power with high accuracy.

Ordering Information

Amplifier Units [\[Dimensions→page 23\]](#)

Type	Appearance	Connecting method	Model		Applicable wire-saving connector (sold separately)	
			NPN output	PNP output	Type	Model
Standard models		Pre-wired (2 m)	E3X-DA21-S 2M	E3X-DA51-S 2M	---	---
		Wire-saving connector*	E3X-DA7-S	E3X-DA9-S	Master connector	E3X-CN21
Ultra-long-term APC models		Pre-wired (2 m)	E3X-DA21R-S 2M	E3X-DA51R-S 2M	---	---
		Wire-saving connector*	E3X-DA7R-S	E3X-DA9R-S	Master connector	E3X-CN21
High-speed response models		Pre-wired (2 m)	E3X-DA21F-S 2M	E3X-DA51F-S 2M	---	---
		Wire-saving connector*	E3X-DA7F-S	E3X-DA9F-S	Master connector	E3X-CN11
					Slave connector	E3X-CN12

* An Wire-saving connector sold separately is required.

E3X-DA-S

Wire-saving connector (sold separately) Protection stickers attached [\[Dimensions→page 25\]](#)

Type	Appearance	Cable length	No. of conductors	Model
Master connector		2 m	4	E3X-CN21
Slave connector			2	E3X-CN22
Master connector			3	E3X-CN11
Slave connector			1	E3X-CN12

Note: The E3X-CN11/12 can also be used to connect to the E3X-DA□-S (□: 7/9) or the E3X-DA□R-S (□: 7/9), but the output lines will support only 1 channel. Output function for channel 2 or APC alarm output function will be disabled.

Ratings and Specifications

Amplifier Units

Item	Type Model	Standard models	Ultra-long-term APC models	High-speed response models
		E3X-DA□-S (□: 21/51/7/9)	E3X-DA□R-S (□: 21/51/7/9)	E3X-DA□F-S (□: 21/51/7/9)
Light source (wavelength)		Red,4-element LED (625 nm)		
Power supply voltage		12 to 24 VDC ±10%, ripple (p-p) 10% max.		
Power consumption		Normal mode : 960 mW max. (Current consumption: 40 mA max. at 24 VDC, 80 mA max. at 12 VDC) Power saving ECO1: 720 mW max. (Current consumption: 30 mA max. at 24 VDC, 60 mA max. at 12 VDC) Power saving ECO2: 600 mW max. (Current consumption: 25 mA max. at 24 VDC, 50 mA max. at 12 VDC)		
Control output / APC alarm output		Load power supply voltage: 26.4 VDC max.; NPN/PNP open collector; load current: 50 mA max.; residual voltage: 2 V max.		
External input *1		No-voltage input (contact / transistor) *2		---
Protection circuits		Power supply reverse polarity protection, output short-circuit protection and output reverse polarity protection		
Re-sponse time	Super-high-speed Mode *3	Operate or reset: 80 μs		NPN output: Operate: 46 μs, Reset: 48 μs PNP output: Operate: 51 μs, Reset: 53 μs
	High-speed Mode	Operate or reset: 250 μs		---
	Standard Mode	Operate or reset: 1 ms		
	High-resolution Mode	Operate or reset: 4 ms		
	Tough Mode	Operate or reset: 16 ms		
Sensitivity setting		Teaching or manual method		
Func-tions	Power tuning	Light emission power and reception gain, digital control method		
	Differential detection	Switchable between Single-edge and Double-edge Detection Modes. Single edge: Set to 250 μs, 500 μs, 1 ms, 10 ms, or 100 ms. Double edge: Set to 500 μs, 1 ms, 2 ms, 20 ms, or 200 ms		---
	Automatic power control (APC)	Always enabled. High-speed control of emission current Wide-range APC for the E3X-DA□R-S		
	Timer	Select from timer disabled, OFF-delay, ON-delay, One-shot, or ON-delay + OFF-delay timer 1 ms to 5 s (1 to 20 ms set in 1-ms increments, 20 to 200 ms set in 10-ms increments, 200 ms to 1 s set in 100-ms increments, and 1 to 5 s set in 1-s increments)		
	ATC	Provided		
	APC margin display	---	Provided	---
	Slow-motion display	---		Provided
	Zero reset	Negative values can be displayed. (Threshold value is shifted.)		
	Resetting settings	Select from initial reset (factory defaults) or user reset (saved settings).		
	Mutual interference prevention	Possible for up to 10 units *4		---
	ECO Mode *5	Select from OFF (digital display lit), ECO1 (digital display dimmed), and ECO2 (digital display OFF).		
	External input setting *1	Select from teaching operations, power tuning, zero reset, emitter OFF, or ATC start.		---
Output setting	Select from output for each channel, area output, or self-diagnosis.	---		
Indicator	Operation indicator for channel 1(orange) Operation indicator for channel 2(orange)	Operation indicator for channel 1(orange) APC alarm output indicator (orange)	Operation indicator for channel 1(orange) Power tuning indicator (orange)	

*1. Only for Pre-wired models.

*2. The following details apply to inputs.

	Contact input (relay or switch)	Non-contact input (transistor)
NPN	ON: Shorted to 0 V (sourcing current: 1 mA max.). OFF: Open or shorted to Vcc.	ON: 1.5 V max. (sourcing current: 1 mA max.) OFF: Vcc - 1.5 V to Vcc (leakage current: 0.1 mA max.)
PNP	ON: Shorted to Vcc (sinking current: 3 mA max.). OFF: Open or shorted to 0 V.	ON: Vcc - 1.5 V to Vcc (sinking current: 3 mA max.) OFF: 1.5 V max. (leakage current: 0.1 mA max.)

*3. The communications function and mutual interference prevention function are disabled if detection is set to Super-high-speed mode.

*4. Mutual interference prevention is enabled if Amplifier Units are connected together. It is also enabled in the same way if E3X-DA-S-series Units and E3C-LDA-series Units are used together. If power tuning is enabled, mutual interference prevention can be used for up to six units.

*5. For the E3X-DA□-S (□: 21/51/7/9), the rated sensing distance is approximately 1/2 and the incident level is approximately 1/3 of the normal levels when ECO mode is enabled.

E3X-DA-S

Item	Model	E3X-DA□-S (□: 21/51/7/9)	E3X-DA□R-S (□: 21/51/7/9)	E3X-DA□F-S (□: 21/51/7/9)
Digital display		Select from incident level + threshold or other 6 patterns (Refer to 6. <i>Display switch</i> on page 17.)		
Display orientation		Switching between normal / reversed display is possible.		
Key lock		Key lock	Key lock / Easy key lock.	
Ambient illumination (Receiver side)		Incandescent lamp: 10,000 lux max. Sunlight: 20,000 lux max.		
Maximum connectable Units		16 (The ambient temperature specification depends on the number of connected units.)		
Ambient temperature range		Operating: Groups of 1 to 2 Amplifiers: -25 to 55°C Groups of 3 to 10 Amplifiers: -25 to 50°C Groups of 11 to 16 Amplifiers: -25 to 45°C		
		Storage: -30 to 70°C (with no icing or condensation)		
Ambient humidity range		Operating and storage: 35% to 85% (with no condensation)		
Insulation resistance		20 MΩ min. (at 500 VDC)		
Dielectric strength		1,000 VAC at 50/60 Hz for 1 minute		
Vibration resistance		Destruction: 10 to 55 Hz with a 1.5-mm double amplitude for 2 hours each in X, Y and Z directions		
Shock resistance		Destruction: 500 m/s ² for 3 times each in X, Y and Z directions		
Degree of protection		IEC 60529 IP50 (with Protective Cover attached)		
Connection method		Pre-wired (standard length 2 m) or Wire-saving connector		
Weight (packed state)		Pre-wired models: Approx. 100 g, Wire-saving connector models: Approx. 55 g		
Materials	Case	Polybutylene terephthalate (PBT)		
	Cover	Polycarbonate (PC)		
Accessories		Instruction Manual		

Wire-saving connectors

Item	Model	E3X-CN21/22/11	E3X-CN12
Rated current		2.5 A	
Rated voltage		50 V	
Contact resistance		20 mΩ max. (20 mVDC max., 100 mA max.) (The figure is for connection to the Amplifier Unit and the adjacent connector. It does not include the conductor resistance of the cable.)	
No. of insertions		Destruction: 50 times (The figure for the number of insertions is for connection to the Amplifier Unit and the adjacent connector.)	
Materials	Housing	Polybutylene terephthalate (PBT)	
	Contacts	Phosphor bronze / gold-plated nickel	
Weight (packed state)		Approx. 55 g	Approx. 25 g

Sensing Distance

E3X-DA□-S (□: 21/51/7/9) ■ E3X-DA□F-S (□: 21/51/7/9)

Note: The E3X-DA□F-S uses only Super-high-speed mode. The sensing distance is the same as for the Super-high-speed mode of the E3X-DA□-S.

Fiber Unit		Amplifier Unit		E3X-DA□-S (□: 21/51/7/9)

Reflective models	11 mm	Side view	E32-D36P1 2M	700	500	300	200	90

* The fiber length is 2 m on each side, so the sensing distance is given as 4,000 mm.

For information on Fiber Units, refer to the Fiber Sensors Best Selection Catalog (Cat. No. E353).

E3X-DA-S

E3X-DA□-S (□: 21/51/7/9) ■ E3X-DA□F-S(□: 21/51/7/9)

Note: The E3X-DA□F-S uses only Super-high-speed mode. The sensing distance is the same as for the Super-high-speed mode of the E3X-DA□-S.

Fiber Unit		Amplifier Unit		E3X-DA□-S (□: 21/51/7/9)				
Detection without background interference (Convergent-reflective)				Sensing distance (unit: mm)				
Sensing method	Sensing direction	Size	Model	Tough mode	High-resolution mode	Standard mode	High-speed mode	Super-high-speed mode
Reflective models	Flat view	Standard	E32-L16-N 2M *	0 to 15				0 to 12
		Small	E32-L24S 2M *	0 to 4				
	Top view	---	E32-L25L 2M *	5.4 to 9 (center 7.2)				
	Flat view		E32-L24L 2M *	2 to 6 (center 4)				

* If operation is affected by the background, perform power tuning or set operation to ECO mode to reduce the amount of light that is received.

Fiber Unit		Amplifier Unit		E3X-DA□-S (□: 21/51/7/9)				
Detection of transparent objects (Retro-reflective)				Sensing distance (unit: mm)				
Sensing method	Type	Model		Tough mode	High-resolution mode	Standard mode	High-speed mode	Super-high-speed mode
Retro-reflective models	Square	E32-R16 5M + E39-R1 (attached) *1		150 to 1,500				
	Small	E32-R21 2M + E39-R3 (attached) *1		10 to 250				
	Film detection *2	E32-C31 2M + E39-F3R+E39-RP37 *1		250		200	---	
		E32-C31 2M + E39-F3R+E39-RSP1 *1		450		300	100	

*1. When using a highly reflective object, light reflected from the object may affect the sensor.

*2. The effect may be small due to the film. Also, stable detection may not be possible when there is a sensing object directly in front of the Lens Unit. Be sure to check operation in advance.

E3X-DA-S

E3X-DA□R-S (□: 21/51/7/9)

Fiber Unit		Amplifier Unit		E3X-DA□R-S (□: 21/51/7/9)				
Detection without background interference (Convergent-reflective)				Sensing distance (unit: mm)				
Sensing method	Sensing direction	Size	Model	Tough mode	High-resolution mode	Standard mode	High-speed mode	Super-high-speed mode
Reflective models	Flat view	Standard	E32-L16-N 2M *	0 to 15				0 to 12
		Small	E32-L24S 2M *	0 to 4				
	Top view	---	E32-L25L 2M *	5.4 to 9 (center 7.2)				
	Flat view	---	E32-L24L 2M *	2 to 6 (center 4)				

* If operation is affected by the background, perform power tuning to reduce the amount of light that is received.

Fiber Unit		Amplifier Unit		E3X-DA□R-S (□: 21/51/7/9)				
Detection of transparent objects (Retro-reflective)				Sensing distance (unit: mm)				
Sensing method	Type	Model		Tough mode	High-resolution mode	Standard mode	High-speed mode	Super-high-speed mode
Retro-reflective models	Square	E32-R16 5M + E39-R1 (attached) *1		150 to 1,500				
	Small	E32-R21 2M + E39-R3 (attached) *1		10 to 250				
	Film detection *2	E32-C31 2M + E39-F3R+E39-RP37 *1		250	200	150	100	50
		E32-C31 2M + E39-F3R+E39-RSP1 *1		600	300	225	150	75

*1. When using a highly reflective object, light reflected from the object may affect the sensor.

*2. The effect may be small due to the film. Also, stable detection may not be possible when there is a sensing object directly in front of the Lens Unit. Be sure to check operation in advance.

 *2. This input does not exist the E3X-DA51F-S.

* For the E3X-DA9R-S, this is the APC alarm output. This output does not exist on the E3X-DA9F-S.

Note: 1. Operation with area settings is as follows:
 LIGHT ON: ON when the incident level is between the thresholds for channels 1 and 2.
 DARK ON: OFF when the incident level is between the thresholds for channels 1 and 2.
 2. Timing Charts for Timer Settings (T: Set Time)

ON delay	OFF delay	One-shot	ON delay and OFF delay

T₁: ON-delay set time
 T₂: OFF-delay set time
 T₁ and T₂ can be set separately.

E3X-DA-S

Nomenclature

Amplifier Units

E3X-DA□-S (□: 21/51/7/9)

Note: Nomenclature and operating procedures for the E3X-DA□R-S and E3X-DA□F-S (□: 21/51/7/9) are given on pages 19 and 20.

Operating Procedure

1 Setting the Operation Mode

The operation mode is set in SET Mode.
→ Refer to 5. Setting Functions on page 16.

Set the Channel Selector Switch to the desired channel before making any adjustments or settings.

2 Adjusting the Power (RUN Mode)

The current incident light level can be adjusted near the power tuning target value (default: 2,000).

- * Confirm that the MODE Key setting is PTUN (power tuning). The default setting is PTUN.
→ Refer to 5. Setting Functions on page 16.
- * If power tuning is executed while SHS is selected for the detection function, the minimum power will be set.

To restore the default power setting:

* Press the DOWN Key right after pressing the MODE Key.

"OFF" will flash twice.

This restores the default setting.

* Setting Errors

An error has occurred if one of the following displays appears after the progress bar is displayed.

Display	Error	Action
Flashes twice PTUN OVER	Over Error The incident light level is too low for the power tuning target value.	The power will not be tuned. The power can be increased up to approximately 5 times the incident light value.
Flashes twice PTUN BOTM	Bottom Error The incident light level is too high for the power tuning target value.	The power will be turned to the minimum level. The power can be decreased down to approximately 1/20th the incident light value.

3 Setting Thresholds Manually (RUN Mode)

A threshold can be set manually. A threshold can also be adjusted manually after teaching to fine-tune it.

* Even if the display method is changed, the threshold will appear on the sub-display when the key is pressed.

4 Teaching the Threshold (SET Mode)

- * There are five methods that can be used for teaching, as described below. Use the method most suitable for the application.
- * Two-point teaching, positioning teaching, and automatic teaching can be performed in RUN Mode.
- For operating procedures, refer to the *Instruction Manual* provided with the product.
- * An error has occurred if OVER or LO is displayed on the sub-display. If that occurs, repeat the operation from the beginning.

4-1. Setting the Threshold at Maximum Sensitivity

The threshold can be set to the maximum sensitivity. This is useful when the longest detection distance is required.

4-2. Teaching a Through-beam Fiber Unit without a Workpiece

You can set the threshold to below the incident light level without a workpiece by the percentage set for the teaching level.

→ Refer to 5. Setting Functions on page 16.

4-3. Teaching a Reflective Fiber Unit without a Workpiece

You can set the threshold to above the incident light level without a workpiece by the percentage set for the teaching level.

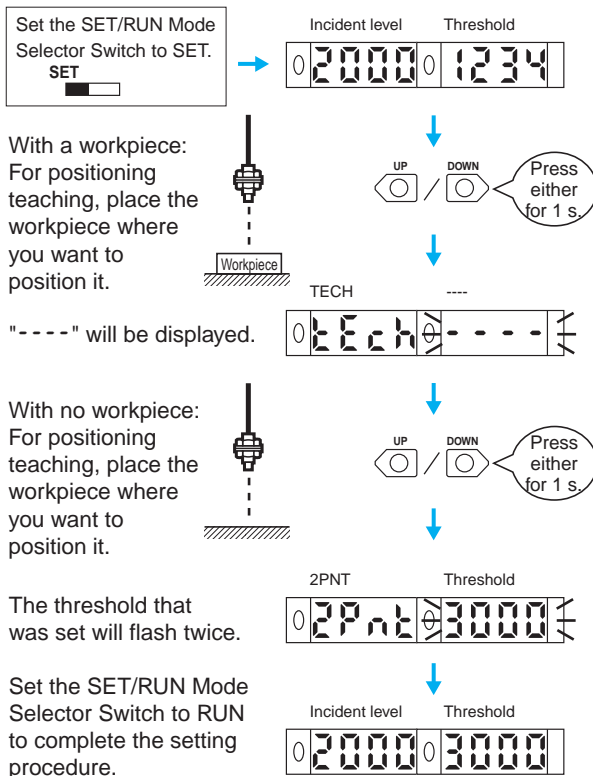

→ Refer to 5. Setting Functions on page 16.

4-4. Two-point Teaching

4-5. Positioning Teaching

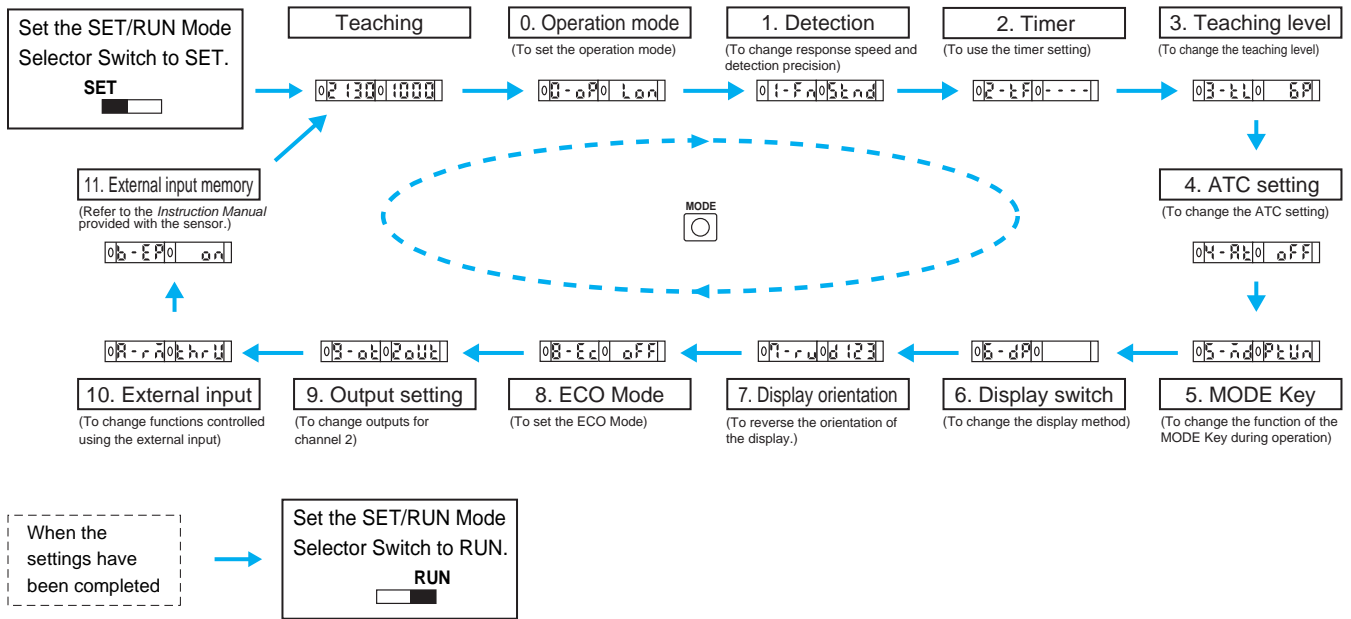

Two points in the following figures are detected, and the intermediate point of the light levels for the two points is set as the threshold.

5 Setting Functions (SET Mode)

* The function transition boxes show the default settings.
 * More functions may be displayed depending on the detailed settings.

Moving between Functions → Refer to 4. Teaching the Threshold on page 15.

Functions

Use the UP and DOWN Keys to change the settings.

Function *	Setting (display)	Description
0. Operation mode	Light ON: 10n, Dark ON: d0n	→ Refer to 1. Setting the Operation Mode on page 14.
1. Detection *	Super-high-speed: 5H5, High-speed: H5, Standard: 5kn, High-resolution: HrE5, Tough: k9, Differential operation: dIFf	Used to change the response speed or detection precision.
	Differential edge (differential operation selected) Single edge: _f~, Double edge: _kk_	Used to set the edge to be detected.
	Differential time Single edge--250 μs: 1, 500 μs: 2, 1 ms: 3, 10 ms: 4, 100 ms: 5, Double edge--500 μs: 1, 1 ms: 2, 2 ms: 3, 20 ms: 4, 200 ms: 5	Used to set the differential response time.
2. Timer	Timer disabled: - - - -, OFF-delay timer: 0FFd, ON-delay timer: 0n-d, One-shot timer: !5hk ON-delay + OFF-delay timer: 0n0F	Used to enable or disable timers.
	Time (timer enabled) 1 to 20 ms: 1-ms increments, 20 to 200 ms: 10-ms increments, 200 ms to 1 s: 100-ms increments, 1 to 5 s: 1-s increments	Used to change timer settings when timers are enabled. The timer can be set from 1 to 5,000 ms.
3. Teaching level	Setting range: 0P to 99P	Used to change the threshold setting when teaching a Through-beam Fiber Unit without a workpiece or teaching a Reflective Fiber Unit without a workpiece.
4. ATC setting	ATC enabled: 0n, ATC disabled: 0FF	Used to enable or disable the ATC function.
	Setting at Power-ON (ATC ON) No setting: 0FF, ATC start processing: Rkc, Power tuning and ATC start processing: PkRk	Used to set the processing to be performed when the power is turned ON.
5. MODE Key *	Executes power tuning: Pkk, Executes a zero reset: 0r5k, Two-point teaching: 2Pnk, Automatic teaching: Rkk0, ATC start: Rkc	Used to change the function of the MODE Key during RUN operation.
	Power tuning target value (performing power tuning) Setting range: 100 to 3,900 (increments of 100) Maximum power: Fkkk	Used to set target values during power tuning. → Refer to 2. Adjusting the Power on page 14.

* The detection settings and MODE Key settings are the same for channel 1 and channel 2. Other functions can be set separately for each channel.

Function	Setting (display)	Description
6. Display switch	 Incident level Threshold	Used to display the incident light level and the threshold.
	 % incident level Threshold	Used to display the incident light level as a percentage of the threshold and the threshold.
	 PEAK BOTM Fixed interval	Used to display the peak and bottom levels of incident light within a set time. (Updated every 2 s.)
	 L-PE D-BT	Use to display the incident light peak level and no incident light bottom level. (Refreshed when output turns ON or OFF.)
	 Detection status	Analog bar display. The current detection status is displayed as an analog bar. The bar will lengthen from the right as ON status is reached. (ON: Red, OFF: Green)
	 Current incident level PEAK Fixed interval Current incident level Peak incident level	Used to display the current incident light level and the peak incident light level. Display changes at a fixed interval.
	 Incident level Channel (unit number)	Used to display the incident light level and the channel (unit number).
7. Display orientation	Normal display: 3112, Up/down reversed display: 213 P	Used to reverse the orientation of the display.
8. ECO Mode	Lit digital display: 0FF, Dimmed digital display: E c 0 i, OFF: E c 0 z	Used to enable or disable the ECO mode.
9. Output setting	Each channel: 2 0 0 z, Output when the incident light level is between two thresholds: R r E R, Self-diagnosis output: S E L F	Used to change the output details for channel 2. This setting will be disabled if the detection function is set to DIFF (i.e., differential operation) and the output will be used for an alarm output.
10. External input	Through-beam, no-workpiece teaching: t h r u, Reflective, no-workpiece teaching: r F c t, Two-point teaching: z P n t, Automatic teaching: R u t o, Power tuning: P t u n, Zero reset: 0 r S t, Light OFF: L 0 F F, ATC start: R t c	Used to change the functions to be controlled using the external input. (Refer to the <i>Instruction Manual</i> provided with the sensor.)
11. External input memory	Write results to EEPROM: 0 0, Do not write results to EEPROM: 0 F F	Used to set writing the results. (Refer to <i>Instruction Manual</i> provided with the product.)

6 Convenient Functions

6-1. Setting the Digital Display to Zero (Zero Reset)

The incident light level on the main display can be set to 0. The incident light level and the threshold will both be shifted. This is useful when you want to set the reference display to zero.

* Change the function to 0RST (zero reset) with the MODE Key. The default setting is PTUN.
 → Refer to 5. Setting Functions on page 16.

6-2. Locking the Keys (Key Lock)

All key operations can be disabled.

“LOC ON” will flash twice and key operations will be disabled.

To release the lock:

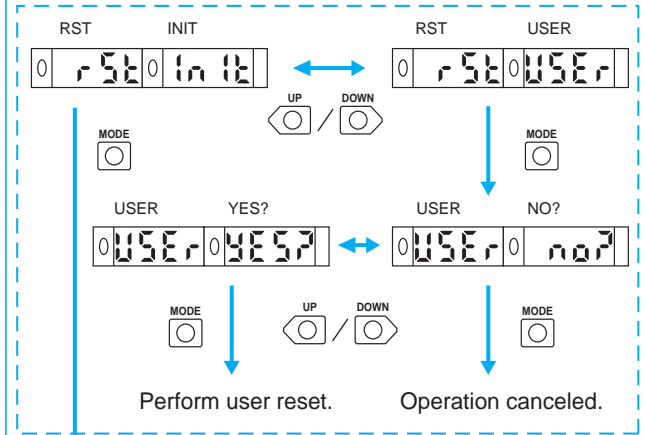

“LOC OFF” will flash twice and key operations will be enabled.

* If a key is pressed while key operations are locked, “LOC ON” will flash twice on the display to indicate that key operations have been disabled.

*1. Press the DOWN Key right after pressing the MODE Key.
 *2. Press the UP Key right after pressing the MODE Key.

6-3. Resetting Settings (Initial Reset or User Reset)

All settings can be returned to the factory defaults or to user-saved settings.

(The steps within the dotted lines can be used if settings have been saved by the user.)

Saving User Settings

The current settings can be saved.

Nomenclature

Amplifier Units

E3X-DA□R-S (□: 21/51/7/9)

Operating Procedure

Basic operating procedures are given on pages 14 to 18. For details, refer to the Instruction Manual provided with the product. This section shows functions specific to the E3X-DA□R-S.

1 Locking the Keys (Easy Key Lock)

Before shipment, all key operation except for the MODE Keys can be disabled.

Note: Do not switch the lock while in SET Mode. Doing so will disable changing settings. If the lock is switched to in SET Mode, return to the unlock state, and then make the setting again.

Unlocking

2 Displaying the APC Margin

Displaying the APC margin can be useful for planning maintenance. When the APC margin is 0%, APC alarm output will turn ON, and the APC alarm output indicator will light regardless of the operation of the APC margin display.

Press the MODE Key to display the following for 10 s.

E3X-DA-S

Nomenclature

Amplifier Units

E3X-DA□F-S (□: 21/51/7/9)

Operating Procedure

Basic operating procedures are as given on pages 14 to 18. For details, refer to the Instruction Manual provided with the product. This section shows functions specific to the E3X-DA□F-S.

1 Locking the Keys (Easy Key Lock)

Before shipment, all key operation except for the MODE Keys can be disabled.

Set the SET/RUN Mode Selector Switch to RUN.
RUN
(Factory-set to RUN)

Set the Easy Key Lock Selector Switch to Locked.
Locked

Note: Do not switch the lock while in SET Mode. Doing so will disable changing settings. If the lock is switched to in SET Mode, return to the unlock state, and then make the setting again.

Unlocking

Set the SET/RUN Mode Selector Switch to RUN.
RUN
(Factory-set to RUN)

Set the Easy Key Lock Selector Switch to Unlocked.
Unlocked

2 Displaying the Change of the incident level

Changes of the incident level for high-speed workpiece detection can be displayed. This enables checking the margin level of light received and the workpiece ON time in slow motion.

Set the SET/RUN Mode Selector Switch to RUN.
RUN
(Factory-set to RUN)

Set the Easy Key Lock Selector Switch to Locked.
Locked

Turn OFF the output or convey the workpieces.

Incident level Threshold
0 3112 0 2000

Press the MODE key.

MODE

"A" is displayed when the output is ON or until approximately 10 s has elapsed. (Key operations will not be accepted in the status.)

A

"STAT" will be displayed and the slow-motion display will start.

STAT

The incident level in intervals of 17 μs will be displayed for approximately 20 s every 160 ms (between 0.5 ms before ON to 1.5 ms after ON).

Incident level Threshold
0 3112 0 2000

...

Incident level Threshold
0 1000 0 2000

...

Incident level Threshold
0 2000 0 2000

Press the MODE Key, or wait for the slow-motion display to end.

MODE

The output ON time will be displayed.

Output ON time Unit: μs
0 250 0 05

END will be displayed.

END

The display will return to the normal display.

Incident level Threshold
0 3112 0 2000

Error Display	The following will be displayed if the ON time exceeds 1,500 μs.	The following will be displayed if the change in the light amount is low. *	* This may also be displayed when detecting a workpiece with a small change in light amount or a slow workpiece of 1,500 μs or longer.
	OVER US 	NON DETC 	

Safety Precautions

To ensure safe operation, be sure to read and follow the *Instruction Manual* provided with the sensor.

WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

CAUTION

Do not use the sensor with voltage in excess of the rated voltage. Excess voltage may result in malfunction or fire.

Never use the sensor with an AC power supply. Otherwise, explosion may result.

Precautions for Safe Use

The following precautions must be observed to ensure safe operation of the sensor.

1. Do not use the sensor in an environment where explosive or flammable gas is present.
2. Do not use the sensor in a location subject to splattering with water, streams, oils, or chemicals.
3. Do not attempt to disassemble, repair, or modify the sensor.
4. Do not apply voltages or currents that exceed the rated range to the sensor.
5. Do not use the sensor in an ambient atmosphere or environment that exceeds the ratings.
6. Wire the power supply correctly, including the polarity.
7. Connect the load correctly.
8. Do not short-circuit the load at both ends.
9. Do not use the sensor if the case is damaged.
10. Dispose of the sensor as industrial waste.
11. Do not use the sensor in locations subject to direct sunlight.

Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

Amplifier Unit

Designing

Operation after Turning Power ON

The sensor is ready to detect within 200 ms after the power supply is turned ON. If the sensor and load are connected to separate power supplies, be sure to turn ON the sensor first.

Time may be required for the incident level to stabilize after the power supply is turned ON.

Operation at Power OFF

A pulse may be output when the power supply is turned OFF. Turn OFF the power supply to the load or the load line before turning OFF the power supply to the sensor.

Mutual Interference Protection Function

Mutual interference prevention is enabled if Amplifier Units are connected together. It is also enabled in the same way if E3X-DA-S-series Units and E3C-LDA-series Units are used together.

Mounting

Connecting and Disconnecting Connectors

Mounting Connectors

1. Insert the Master or Slave connector into the Amplifier Unit until it clicks into place.

2. Attach the protective seals (provided as accessories) to the sides of master and slave connectors that are not connected.

Note: Attach the seals to the sides with grooves.

Removing Connectors

1. Slide the slave Amplifier Unit away from the other unit.
2. After the Amplifier Unit has been separated, press down on the lever on the connector and remove it. (Do not attempt to remove a connector without first separating the Amplifier Unit from the other Units.)

Adding and Removing Amplifier Units

Adding Amplifier Units

1. Mount the Amplifier Units one at a time onto the DIN track.

2. Slide the Amplifier Units together, line up the clips, and press the Amplifier Units together until they click into place.

Removing Amplifier Units

Slide Amplifier Units away from each other, and remove from the DIN track one at a time. (Do not attempt to remove Amplifier Units from the DIN track without separating them first.)

Note: 1. The specifications for ambient temperature will vary according to the number of Amplifier Units used together. For details, →refer to *Ambient temperature range* on page 4.
2. Always turn OFF the power supply before joining or separating Amplifier Units.

Mounting the End Plate (PFP-M)

Use an End Plate if the Amplifier Unit might move due to vibration.

Fiber Connection

The E3X Amplifier Unit has a lock lever for easy connection of the Fiber Unit. Connect or disconnect the fibers using the following procedures:

1. Connecting Fibers

Open the protective cover, insert the fibers according to the fiber insertion marks on the side of the Amplifier Unit, and lower the lock lever.

Note: Do not pull on the fiber, apply pressure on it, or otherwise subject it to excessive force when it is attached to the Amplifier Unit. (Use a force of 0.3 N·m max.)

Fibers with E39-F9 Attachment

Fibers That Cannot Be Free-Cut (with Sleeves)

2. Disconnecting Fibers

Remove the protective cover and raise the lock lever to pull out the fibers.

Note: 1. To maintain the fiber properties, confirm that the lock is released before removing the fibers.
2. Be sure to lock or unlock the lock lever within an ambient temperature range between -10°C and 40°C .

Adjusting

Mutual Interference Protection Function

The values that appear on the digital display may fluctuate somewhat due to light from other sensors. If this occurs, you can stabilize detection by setting a threshold that is close to half way between the incident levels with and without a sensing object.

Output Short-circuits Protection

OVER/CUR will flash on the display if the output short-circuit protection function operates due to a load short-circuit in a control output. If this occurs, check the load connections.

EEPROM Writing Error

If the data is not written to the EEPROM correctly due to a power failure or static-electric noise, initialize the settings with the keys on the Amplifier Unit. ERR/EEP will flash on the display when a writing error has occurred.

Optical Communications

Several Amplifier Units can be slid together and used in groups. Do not, however, slide the Amplifier Units or attempt to remove any of the Amplifier Units during operation.

Others

Protective Cover

Always keep the protective cover in place when using the Amplifier Unit.

Mobile Console

The E3X-MC11-SV2 Mobile Console does not currently support the new Tough Mode and ON-delay + OFF-delay timer. You also cannot use the E3X-MC-S.

Communications Unit

Use an E3X-DRT21-S Version 3 Communications Unit. This is not supported for the E3X-DA□R-S and E3X-DA□F-S (□: 21/51/7/9).

Dimensions

Tolerance class IT16 applies to dimensions in this data sheet unless otherwise specified.

READ AND UNDERSTAND THIS DOCUMENT

Please read and understand this document before using the products. Please consult your OMRON representative if you have any questions or comments.

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

SUITABILITY FOR USE

THE PRODUCTS CONTAINED IN THIS DOCUMENT ARE NOT SAFETY RATED. THEY ARE NOT DESIGNED OR RATED FOR ENSURING SAFETY OF PERSONS, AND SHOULD NOT BE RELIED UPON AS A SAFETY COMPONENT OR PROTECTIVE DEVICE FOR SUCH PURPOSES. Please refer to separate catalogs for OMRON's safety rated products.

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the product.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PERFORMANCE DATA

Performance data given in this document is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

COPYRIGHT AND COPY PERMISSION

This document shall not be copied for sales or promotions without permission.

This document is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this document in any manner, for any other purpose. If copying or transmitting this document to another, please copy or transmit it in its entirety.
